- Amino Acids & Derivatives
- Biodetergents
- Excipients
- Protein Precipitation Reagents
- GMP Repacking Services

We are committed to the Science Based Targets initiative (SBTi)

NCC have committed to the Science Based Targets initiative (SBTi) and our commitment has been approved by the SBTi. Given our position in the supply chain, we are adopting a supplier engagement approach to address Scope 3 emissions.

We are working closely with our suppliers to encourage and support them in setting their own science-based targets, ensuring that a defined proportion of our supply chain aligns with global climate goals over time.

Sustainability is a fundamental principle of NCC's everyday work, and this commitment approval marks an important step in our sustainability journey.

NCC are **one of our true partners** as is evidenced by the fact that no other supplier supplies more products to our API site
